  CBSE (Class XII)

Projects

Blood Bank and Donor Management System | Python, Html, CSS, JavaScript, Django, MySQL   **May 2024**

- Blood Bank and Donor Management System is a software solution that streamlines the management of blood donations and inventory. It tracks donor information, schedules donations, and monitors blood stock levels. The system ensures efficient matching of blood types with recipients, maintains donor eligibility records, and supports emergency notifications, enhancing the overall efficiency and reliability of blood bank operations.

QR code generator: | HTML, CSS, JavaScript, Bootstrap.   **July 2024**

Developed a dynamic QR code generator using HTML, CSS, and JavaScript, allowing users to create and customize QR codes for various purposes. This project demonstrates proficiency in front-end web development and interactive JavaScript applications.

Technical Skills

Programming Languages: JAVA, HTML/CSS, JavaScript.
Developer Tools: Visual Studio Code, Eclipse.
Technologies/Frameworks: Bootstrap, Tailwind

Soft Skills

- Team work
- Adaptability
- Quick Learner
- Time Management

Certifications

- Summer Training in DSA with JAVA
- Internship in Full Stack Web development .
